Calgary's VistaVu Solutions acquires assets of SRH Consulting of Dallas

Two SAP Business One leaders join forces to offer more to oil and gas service companies.

Calgary, Alberta, Canada, September 10 – North American oil and gas service companies now have a better way to access software and services to manage their field operations and increase their profitability.

VistaVu Solutions of Calgary, Alberta today announced its acquisition of the SAP consulting practice of SRH Consulting LLC of Grapevine, Texas, near Dallas. Both VistaVu and SRH have been recognized by SAP for their expertise in developing and delivering sector-specific Business One applications.

"At VistaVu, we use technology to help our clients see the whole picture from the field, and manage accordingly," says Jory Lamb, VistaVu's President and CEO. "In SRH Consulting, we found a perfect fit, both operationally and philosophically. This will broaden our client list, and provide local, seasoned professionals with a proven track record of success into the Texas market."

The acquisition affects more than 20 SRH Consulting clients in Houston, Dallas, west Texas, Oklahoma and Arkansas in the areas of manufacturing, distribution and services for oil and gas service companies. Agreements have also been reached to add two senior SAP Business One members and one SAP Solution Consultant to the VistaVu team in sales and implementation.

Potential clients with a focus on providing energy services and related oilfield products will benefit from VistaVu's industry knowledge, specific product solution (FieldVu) and network of customers across Texas, Alberta and Colorado.

"We're delighted that we were able to retain many SRH senior managers, who will continue to service the needs of their customers in the Texas market," says Lamb. "The new and deeper VistaVu team will provide a compelling value proposition for oil and gas service firms in three of North America's premier energy jurisdictions."

VistaVu Solutions LLC is a top SAP Business One partner in North America. With over 50 clients in the United States (Houston, Dallas, Denver) and Canada (Calgary, Edmonton), the company's mission-critical software solution FieldVu runs the day-to-day operations of leading field services companies, supported by an award-winning team.
