

Date: May 10th, 2021

This releases focuses on adding new functionality to the Inventory Report screen as well as a number of performance enhancements and bug fixes.

Inventory Report - Branch & Increased Filter Functionality

In order to increase the usability of the Inventory Report screen, a couple of important updates have been made:

- Add the branch location to the table, and as a possible filter
- Add a select menu which will add or remove rows which have zero inventory in certain columns

The screenshot shows the 'Inventory Report' screen in FieldVu. A search bar is at the top left. A dropdown menu is open over the 'Branch' column, showing options: 'Planned/Unsubmitted', 'Submitted/Not Approved', and 'Show Rows with 0 Inventory'. The table below has the following data:

Item	Inventory Location	SAP ByDesign Inventory	Planned / Unsubmitted	Submitted Not Approved	Projected Inventory	Last Updated From SAP ByDesign		
P100001 - Liquid Coolant	Cleveland	P1100-20	65.00	31	49	-15.00	1:26 PM May 10, 2021	
P100077 - Liquid Coolant k	EA	Almika Heating Cleveland	P1100-20	120.00	1	1	118.00	9:36 AM May 10, 2021
Total			185.00	32	50	103.00		

With these updates, it becomes possible for a user to narrow down the results to show precisely what they are interested in. This is especially true for companies which may use a common Inventory Location name.

Equipment Ref Fields Visible Throughout FieldVu

In an effort to bring more information relating to a piece of Equipment to FieldVu, Equipment Reference fields are now shown on the Work Orders summary page in FieldVu Cloud, and the Work Order details page in FieldVu Mobile.

This is especially useful for customers who use the available reference fields for additional unique identifiers for their equipment.

Addition of a FreshDesk Support Widget

If a company uses FreshDesk for their internal Support issue tracking and knowledge repository, FieldVu Cloud can now interface directly with that and show a widget on the screen. This will provide access to any FieldVu Cloud user to the company's own support articles.
